

Introduces the

CPM 7000

Process Data Recorder

The CompuDAS Model CPM-7000 Critical Process Monitoring System is a multi-channel programmable full-featured data acquisition system.

Uses include:

- Records process data from autoclaves, ovens and presses
- Automatic start/stop data logging
- Controlled environment monitoring of temperature, humidity, etc.
- Strip Chart recorder replacement
- Compatible with all common transducers, thermocouples, RTD's and 4-20ma measurement devices

On-board storage accommodates approximately 3,000,000 readings.

Readings can be opened directly by Microsoft Excel.[®]

Includes PC-based user interface software for real-time graphing, test setup and data downloading.

CompuDAS[®] Division of Piezo-Metrics Inc.

450 W Enterprise Rd. Shelton, WA 98594
